Dr v. S. Kugler, IV 8 & Corr. ab d. 1. 7. 1915.

"The function φ is defined as follows: $\varphi(x) = \frac{1}{x}$ if $x > 0$, $\varphi(x) = 0$ if $x = 0$, and $\varphi(x) = -\frac{1}{x}$ if $x < 0$.

31/12. 37. suspend. = Reklame $\rightarrow \sqrt{2}$ \approx $\sqrt{2}$

The angularities of the walls of Streblus were very variable, & I found them to be 1/2 in. apart, but in other cases, they were 1/4 in. apart.

Datum: 20. 10. 1981
Ort: Västervik
Beskrivning: En ung hane med mörkt grått
hår och ljusgrått bröst.
Vikt: 1000 g
Längd: 300 mm
Kondition: God
Höjd: 100 mm
Märkning: Tidigare markerad i Västervik
Meddelande: Fågel har nu fått en ny
märkning.

St. Louis 19/10-39 200' west on 1st from corner of 1st & Cypress St. Cyl 0,
approx. 1 ft. thick, tan or light brownish red. No distinct bed, but
appears to be part of the same deposit as the one above. It is
8 ft. thick, tan or light brownish yellow; contains some small
fragments of wood, and some small pebbles of sandstone.
No fossils. At the top there is a thin layer of fine sand.
