me a great invitation for pilfering. But I do hope very much that he did get it. If he did, you might be able, through B. Bischoff, to repeat from France the same. I know Bischoff wd. be glad to do it.

I ~~received~~ received from Ted M. ten off-prints of your prospectus anno ncing the resumption of the D. Archiv. Ted suggested that I send these, as we had discussed, to publishers of med. books in the USA. I do not think too much of that idea, as I shall write Ted, as the only real publisher in this country is the Med. Academy itself; most English books, I mean books in English, on med. subjects are published at the Oxford or Cambridge presses. I think it wd. be far more beneficial to you to have notices put of this in the leading periodicals, and so am writing, enclosing a copy, to: The Amer. Hist. Review, the Catholic Hist. Review, Mediaeval Studies (whose editor I know well; but usually they print no notices), the Germanic Review, and shall send copies to the Oxford and Cambridge Presses in England. Now that you see the picture, I think you'll agree that such a course will be more productive.

By now you will have seen the notice that Ted and I wrote, either from the April Speculum or from Ted's photos. I think it good, but I do regret indeed to say that no one has yet sent me a cheque. But maybe someone will break down, and, surely, the notice had other purposes. In conversations, I have heard only cheer that the MGH is functioning so well and all this publicity and interest is worth while.

Now must dash off to a hasty lunch. I send my very best greetings, wishes and all to both of you. Keep well, and do let me know if there is any special thing ih the line of food or drugs that you need. You know how happy I shd. be to send them.

Yours,

Peter
