

[Handwritten note]

Wrote a paper with some observations. Observed various species of fish which frequent the river. Found many small fish, mostly young ones, swimming near the surface. Found some larger fish, such as a yellow perch, a white sucker, and a small trout.

[Handwritten note]

Wrote paper on the fish found in the river.
Observed that the fish were mostly small.
The most common fish observed was the white sucker, which was abundant in the river.
Also observed were the yellow perch, the white sucker, and the small trout.
The fish were mostly young ones, swimming near the surface.

[Handwritten notes]

Fish observed	Galls observed
White sucker	Yellow flowered
White perch	Red and white flowered
Small trout	Yellow and white flowered
Young fish
